

METALLURGICAL LABORATORY CHAPI SAC

*Leader in Metallurgical Services to the Mining
and Energy Industries*

**Mineral processing
Sample preparation
Hydrometallurgy
Mineralogy
Consulting and Training**

ABOUT US

Laboratory Metallurgical CHAPI SAC, is a company dedicated to serving the Mining, Energy and Construction, characterized by constant innovation in solving metallurgical problems with competitive advantages in time, quality and cost, they have allowed to be the preference of major mining companies domestic and foreign.

Metallurgical Laboratory Chapi SAC has a proven leadership in metallurgical services, backed by an excellent team of professionals, a competent metallurgical laboratory and a network of national and international contacts. Recently completed projects involving the design, execution and analysis of laboratory, pilot plant and industrial level as well as in the development and management of metallurgical projects including technical support during startup and commissioning of new metallurgical operations..

Our **mission** is to provide quality services metallurgical mining and metallurgical industry, energy and construction, to contribute to the solution of metallurgical problems in the design of new metallurgical plants and the optimization of metallurgical plants are in operation..

Our **vision** is to become a leader in the metallurgical services sector, with national and international prestige, meeting quality standards, safety and the environment that exceed the expectations of our customers operational efficiency and effectiveness, becoming a model for organizations of item similar.

METALLURGICAL SERVICES

- Sample Preparation for Geometallurgical Programs.
- Crushing and Grinding Testing.
 - Bond Work Index.
 - Impact Work Index.
 - Abrasion Index.
 - SAG Power Index.
- Concentration Testing.
 - Froth Flotation.
 - Batch Testing.
 - Locked Cycles.
 - Gravimetric Tests.
 - Magnetic Tests.
- Leaching Testing
 - Bottle Roll Tests.
 - Agitate Leaching Tests.
 - Column Leaching Tests.
- Thickening and Filtration Tests.
- Mineral Characterization.
- Project Development.
 - Conceptual Study.
 - Pre Feasibility Study.
 - Pilot Plant.
 - Plant Audit.
- Consulting and Training.
- Applied Metallurgy Research.
